

50 Bedded Ultramodern Multi-Super Speciality Hospital UDAIPUR

VISION

To establish Shantiraj Hospital Pvt. Ltd. as a Centre of Excellence in Cardiac, Liver, and Renal Transplantation, to strengthen already existing facilities, increase existing beds, develop cardiac sciences & start transplant program; ECMO facilities with integrating advanced technology, ethical practice, and compassionate care -making world-class tertiary services accessible to the people of Udaipur and beyond.

MISSION

- 1. Deliver Quality Care:** Provide safe, evidence-based, and outcomes-driven cardiac and transplant surgeries.
- 2. Build Trust:** Foster patient confidence through transparency, ethics, and superior post-operative outcomes.
- 3. Train and Retain Talent:** Develop a skilled, multidisciplinary team proficient in advanced critical care and transplant medicine.
- 4. Integrate Technology:** Utilize robotic and minimally invasive systems, AI-driven diagnostics, and telemedicine for superior results.
- 5. Promote Research and Collaboration:** Partner with national and international institutions for training, CME, and clinical collaboration.

LONG-TERM VISION

To evolve into a regional referral and teaching institute where life-saving transplants, cardiac surgeries, and innovation converge-transforming lives through world-class, affordable healthcare.

Shantiraj Hospital has been a trailblazer in delivering world-class services that set a benchmark across the healthcare. Founded in 1981 by Dr. Ashok Jain, the first unit of Shantiraj Group has established itself as a leader in General, cancer and Laparoscopic surgery. Renowned for our commitment to excellence, we strive to provide unparalleled medical care fused with compassionate support. Our mission is to continuously enhance facilities to ensure the highest standards of healthcare delivery, dedicated to the well-being of our patients.

About Us

Dr. Ashok Jain

Founder Director, Shantiraj Multispeciality Hospital

Senior Cancer Surgeon

Ex- Tata Memorial Mumbai

It was the vision and determination of Dr. Ashok Jain to get quality health care to India which set the blueprint to build Udaipur's first multi-specialty private sector hospital. Therefore, under the inspiring leadership of Dr. Jain, Shantiraj has been recognized as one of the top hospital in Udaipur, delivering outstanding and extraordinary patient care. At Shantiraj, you will find a team of expert physicians, nurses, and staff working together to provide you with advanced medicine in a personalized and caring environment. We believe that continuous quality of care and performance improvement are the foundation for preserving and enhancing health care delivery.

World Record Holder for operating Emergency Laparoscopic Cholecystectomy in 113 yrs Female on 6th Feb 2023. He is practicing at: **Shantiraj Hospital Pvt Ltd, Paras Health, GBH American Hospital, Evya Multispeciality Hospital, Hyderabad, SSV Hospital, Ahmedabad.**

From The Desk of CEO

Mrs. Rashmi Singhal

CEO, Shantiraj Multispeciality Hospital

With a MBA in hospital administration and 12 + years of experience in hospital and health care industry, she is a seasoned and versatile administrator, who can lead and manage diverse operations in a challenging and dynamic environment. Her emphasis has always been on enhancing patient experience by delivering good quality care and enthusiasm lies in bringing Excellence in Healthcare delivery by following quality protocols & ethical principles. Her goal is to support the hospital's vision, mission & values to foster a culture of innovation, collaboration and excellence so as to make a small difference in making this world a more beautiful place to live in.

Why choose SHANTIRAJ HOSPITAL ?

Shantiraj Hospital Pvt. Ltd. is "Boutique Hospital" a specialized healthcare Hospital that typically offers a personalized and luxurious experience to its patients, often focusing on specific medical areas like maternal and child care. Unlike large general hospitals, we prioritize individual attention and high-end amenities.

We emerge as one of the most promising boutique hospitals, recognized for its modern infra structure, advanced medical equipments and skilled healthcare professionals. We make sure that your recovery is as smooth and rapid as possible:

1. **Personalized YOGA expert & counselor for meditation & better mental and physical recovery pre and post-surgery.**
2. **Pre-Surgery Consultation: Thorough evaluation of your medical history and current health condition.**
3. **Surgery Day: Personalized & compassionate pre & post OT transfer.**
4. **Post-Surgery Care: Pain management, physical therapy, and monitoring your recovery in a comfortable, peaceful setting along with 0% tolerance policy for any medical negligence.**
5. **Follow-Up: Regular check-ups to ensure everything is progressing well, and rehabilitation continues to improve your mobility along with personalized counselling by clinical psychologist on a regular basis.**
6. **Team of highly skilled Consultants, paramedical staff, Nursing & Non Clinical Management team to offer a vast range of services under one roof.**
7. **Consultants team comprises of experienced Laparoscopic Surgeons, General Surgeon, Gastro Surgeon, Neuro Surgeon, Physicians, Neurologist, Gastroenterologist, Gynecologist, Orthopaedician's, Cosmetologist & Plastic Surgeon, Maxillofacial Surgeon, Physiotherapists, Dermatologist, Pediatrician and much more.**

The hospital core focus is on providing quality patient care, blending compassionate Care with advanced surgical technology for specialized diagnostic & therapeutic services. Recognizing the anxiety due to illness, the hospital strives to foster an environment of trust and confidence for patients.

- LESS PAIN
- FASTER RECOVERY
- QUICK RETURN TO PHYSICAL ACTIVITY
- LESSER TRAUMA
- EARLY DISCHARGE

What is Robotic Surgery?

Robotic surgery is a type of minimally invasive or laparoscopic (small incision) surgery in which doctors utilize a computer controlled robot to help them with specific surgical procedures. The robot's "hands" have a great degree of motions, allowing surgeons to operate in very small areas in the body that would typically require open (long incision) surgery.

Robotic and minimally invasive surgery has smaller incisions than open surgery (conventional surgery with incisions), resulting in less discomfort and scars.

Using robotic technology, surgeons can execute difficult surgical procedures through small incisions.

Common Robotic Assisted General, Gastroenterology & Colorectal Surgeries

- **Cholecystectomy:** Removal of the gallbladder
- **Gastric Bypass:** Weight-loss surgery
- **Hernia Repair:** Fixing a bulge in the abdominal/ groin area
- **Appendectomy:** Removal of the appendix, usually for appendicitis
- **Robotic Rectopexy:** Fixing rectal prolapse (when the rectum slips out of place) using robotic assistance
- **Pancreatic Whipple:** Removal of part of the pancreas, intestine, and bile duct to treat cancer
- **Pancreatic Tumour Resection:** Removal of a tumour from the pancreas
- **Colorectal Surgery:** Surgery on the colon and/or rectum
- **Abdominoperineal Resection (APR):** Removal of the rectum and anus
- **Lower Anterior Resection:** Removal of the diseased lower part of the colon

1ST & ONLY ROBOTIC SURGERY SYSTEM NOW IN UDAIPUR

What's the difference between open surgery and robotic surgery/minimally invasive surgery?

Between Robotic Surgery/Minimally Invasive Surgery (MIS) and Open Surgery, there are a number of differences, that includes:

- Doctors do minimally invasive surgery by creating small incisions, whereas open surgery requires a larger incision.
- In comparison to open surgery, minimally invasive surgery patients experience fewer traumas.
- Patients who have minimally invasive robotic surgery require less recovery time and can return to work sooner, whereas patients who undergo open surgery require more time.
- Minimally invasive robotic surgery results in significantly less blood loss than open surgery.
- In comparison to open surgery, there is less scarring with minimally invasive robotic surgery.

Benefits of ROBOTIC SURGERY

SSI Mantra Robotic General GI/GI Cancer Surgery stands as a promising choice for patients by providing the following benefits:

Increased Precision

The SSI Mantra is an advanced and incredibly precise surgical robotic system that allows surgeons to perform complex procedures with greater accuracy, magnified vision and more surgical control than traditional procedures.

Smaller Incisions

Robotic Surgery is a minimally invasive procedure that uses smaller incisions than traditional surgery. This reduces scarring, bleeding and trauma and results in a quicker recovery time for patients.

Reduced Risk of Infection

The small incisions in robotic surgery effectively minimize the wound's exposure to the external environment, resulting in a significant decrease in patient susceptibility to infections.

Less Blood Loss

Robotic Surgery is associated with much less blood loss compared to traditional surgeries, which reduces the need for blood transfusion and other associated complications.

Faster Recovery

Robotic Surgery involves smaller incisions and less tissue damage or trauma, which leads to faster patient recovery with less pain, compared to traditional open-heart procedures.

Shorter Hospital Stay

Patients need to spend less time in the hospital with the benefits of faster recovery, making robotic surgery a cost-effective solution.

How is Robotic Surgery Performed

The robotic surgical system "SSI Mantra" consists of a surgeon command centre, patient side arm cart, and vision cart. The surgeon console is equipped with hand controls and foot pedals and 3D, 4K screen, where the surgeon sits, controls and operates the robotic arms. The patient side arm cart are positioned on the operating table according to the type of surgery. The surgical assistant stands next to the patient to change the Mudra instruments in the robotic arms as needed. The vision cart includes a 3d,4K monitor that displays the surgical site inside the patient's body. The surgeon sits in the console and views the surgical area through the 3D, 4K monitors which provides a high magnified view of what the human eye sees. Using hand controls, Mudra instruments are operated. The surgeon's hand movements are precisely replicated by the Mudra instruments inside the patient's body.

Benefits of ROBOTIC SURGERY

01. Is robotic surgery performed by a robot?

Myth: The robot operates on its own.

Fact: No. The surgery is 100% controlled by your surgeon using a robotic system for better precision

02. Is robotic surgery safe?

Myth: It's too new or risky.

Fact: Robotic surgery is clinically proven, safe, and used in leading hospitals worldwide, including India.

03. Will robotic surgery leave a big scar?

Myth: It's like traditional surgery.

Fact: It uses small incisions, meaning less pain, smaller scars, and faster recovery.

04. Is robotic surgery only for rich patients?

Myth: It's unaffordable.

Fact: Thanks to Indian innovations like the SSI Mantra Robot, it's now accessible and cost-effective.

05. Does robotic surgery take longer?

Myth: Technology slows things down.

Fact: Robotic tools help your surgeon operate more efficiently, often reducing surgical time.

06. What is the benefit to me as a patient?

Fact: You can expect faster recovery, fewer complications, less blood loss, and a quicker return to daily life.

Department of Orthopedics

Services we offer

Orthopedics :

- Total Knee Replacement
- Total Hip Replacement
- Key Hole Arthroscopic Surgery for Knee Joint and Shoulder Joint
- Other Arthroscopic Surgeries
- Trauma & Fracture Management
- Sports Rehab

Spine :

- Spasticity Surgery
- Minimal Invasive Spine Surgery
- Vascular Malformation Excision

Why Choose UDAIPUR (RAJASTHAN) ?

Rajasthan is gaining popularity as a destination for medical services due to its growing healthcare infrastructure, affordability, and the unique blend of modern and traditional treatments. The state's "Heal in Rajasthan" policy further encourages medical tourism by offering personalized care, a range of services, and the opportunity to experience the state's rich culture.

Key reasons to choose UDAIPUR (Rajasthan) for medical services :

- High-Quality Care
- Affordable Treatments
- Variety of Services
- Personalized Care
- Cultural Experience
